PROJECT TITLE

To-Do List App

WPS Office

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

T

People often forget daily tasks or struggle to manage them effectively. A simple digital tool is needed to organize tasks and mark them as complete.

PROJECT OVERVIEW

This is a web-based To-Do List application built using HTML, CSS, and JavaScript. It allows users to add, complete, and delete tasks with a clean, user-friendly interface.

WHO ARE THE END USERS?

Students (to track assignments, homework)
Working professionals (to track daily tasks, meetings)
General users (for shopping lists, personal tasks)

TOOLS AND TECHNIQUES

Students (to track assignments, homework) Working professionals (to track daily tasks, meetings) General users (for shopping lists, personal tasks)

POTFOLIO DESIGN AND LAYOUT

Students (to track assignments, homework)
Working professionals (to track daily tasks, meetings)
General users (for shopping lists, personal tasks)

FEATURES AND FUNCTIONALITY

- Add new tasks 
- Mark tasks as completed (strikethrough style) 
- Delete tasks 
- Responsive design (works on desktop and mobile) 
- Local storage support (optional upgrade) 

RESULTS AND SCREENSHOTS

Show screenshots of:
Empty
To-Do list
Adding a
task
Marking a task as
done
Deleting a task

CONCLUSION

The To-Do List app demonstrates how HTML, CSS, and JavaScript can be combined to build an interactive, user-friendly application. It is lightweight, responsive, and can be extended with more features
